

DAMON VERSAGGI

PRODUCT MARKETING | AI PRODUCTS | EMERGING TECHNOLOGY

New York, NY | scrappy meals.com/damo

POSITIONING: I turn technology people do not immediately understand into a story they can buy, use, and repeat. Built and launched AI products, introduced emerging real-time systems into major media organizations, trained 1,000+ users, and worked across product, sales, technology, marketing, and customer teams to move complex ideas into adoption.

SELECTED PRODUCT MARKETING IMPACT

- Built Fridgie Smalls, a consumer AI recipe product used by approximately 20,000 people, translating generative AI into a simple everyday utility around ingredients users already have.
- Improved Fridgie Smalls economics and performance: approximately 72% lower input-token usage, 40% fewer tokens per call, about 2 seconds faster response time, and roughly 4,000 requests per \$1 of API spend.
- Led technical demonstrations, customer education, workflow design, and product adoption for real-time 3D systems used by major media organizations including ESPN, CNN, Fox, ABC, CBS, MSNBC, and Amazon Prime Sports.
- Trained approximately 1,000 artists and operators and led a five-person demo/training team, turning complex product capabilities into repeatable workflows and customer value.
- Combine product, commercial, and technical execution: positioning, launches, pricing and packaging, sales enablement, customer feedback, partnerships, automation, and 0-to-1 product development.

EXPERIENCE

SCRAPPY MEALS LLC / SCRAPPY MEALS XR | Founder, Product & Technology Lead 2016 - Present

- Created and launched Fridgie Smalls, an AI-powered consumer product that turns refrigerator inventory into personalized recipes, substitutions, grocery lists, saved recipes, voice input, and dietary-aware recommendations.
- Owned the product story from concept through adoption: positioning, product strategy, UX, feature prioritization, pricing tiers, demos, partnerships, user feedback, and ongoing optimization.
- Structured Basic, Premium, and Business offerings and developed messaging around practical AI utility rather than AI novelty.
- Built partnerships and product relationships with restaurants and food businesses including Regina's Grocery, Sauced LES, Park Slope Ale House, Lil Frankie's, Pastosa, and Campania.
- Developed Scrappy Meals XR, The Metacheese, 3D menu concepts, and interactive culinary experiences spanning WebXR, AR, real-time 3D, gamification, and consumer engagement.

EFUNDEX | VP, Sales & Technology / Product, Technology & Growth Advisor 2015 - Present

- Work across product, technology, sales, growth, underwriting workflows, compliance, and customer acquisition for a working-capital provider.
- Translate complex lending products into clear market positioning, qualification criteria, sales messaging, objection handling, and customer-facing outreach.
- Develop enablement and go-to-market materials for financing structures including multi-draw lines of credit and 12-36 month products.
- Design AI-assisted prospecting, enrichment, public-record research, workflow, and CRM automation to increase sales efficiency and support scaled outreach.

VIZRT | Solutions, Training & Real-Time Graphics Leadership Earlier Career

- Helped major broadcasters understand, adopt, and operationalize real-time graphics technology when the category was still emerging.
- Led a five-person demo/training team and trained approximately 1,000 artists and operators across complex real-time graphics systems and production workflows.
- Built technical demonstrations and customer narratives that translated software capabilities into practical production, creative, and business value.
- Supported major launches and deployments including Fox Business Network and high-visibility workflows across ESPN, ABC, CNN, and other broadcast organizations.

SELECTED LAUNCHES & HIGH-VISIBILITY WORK

ESPN / NBA HD Launch | CNN 2008 Election | CBS & MSNBC Election Coverage | Fox Business Network | Amazon Prime Sports / Yankees AR | New Year's Rockin' Eve

CORE CAPABILITIES

Product Positioning • Go-to-Market Strategy • Product Launches • AI Products • Technical Storytelling • Sales Enablement • Customer Insights • Messaging • Pricing & Packaging • Product Adoption • Growth Strategy • Executive Presentations • Competitive Positioning • Cross-Functional Leadership • 0-to-1 Product Development

TECHNOLOGY

Generative AI • OpenAI APIs • AI Agents • React • Web Technologies • WebXR • AR • Real-Time 3D • Vizrt • Unreal Engine • Interactive Media • API Integrations • Workflow Automation
